Prof. Dr. Roland Brandt

Brain Research Bulletin – Section Editor

Roland Brandt studied Biochemistry and Philosophy at the Universities of Tübingen and Berlin (Germany), obtained his doctoral degree at the Max-Planck-Institute of Molecular Genetics, Berlin, and continued as postdoctoral research fellow at the Center for Neurologic Diseases (CND), Harvard Medical School, Boston (USA). After returning to Germany, he became an independent research Group Leader at the Interdisciplinary Center for Neuroscience (IZN) at the University of Heidelberg, Germany. 2002 he moved to Osnabrück to become full Professor of Neurobiology and founding director of the Department of Neurobiology, School of Biology/Chemistry, at the University and co-opted member of the Institute of Cognitive Sciences. His research focuses on molecular mechanisms of neuronal development, aging and degeneration. He is author of more than 80 peer reviewed papers and has co-edited two books. Since 2018, he serves as Section Editor of “Brain Research Bulletin” (Elsevier) (Section: Neurodegenerative and Neuroinflammatory Disorders).
